

# ACV-1 “HIPPO”

## Fully Automatic Twistlock

- Automatic locking and unlocking
- Suitable for use with containers equipped with ISO corner fittings
- Vertical clearance between containers equivalent with semi-automatic twistlocks
- Able to withstand extreme weather conditions and heavy loads
- Easy to install and operate
- Safe, mechanical securing to the corner fitting, no fall-off during loading and discharging of containers
- Low maintenance requirements, no greasing required
- Forged from high tensile steel
- Hot-dip galvanized for corrosion protection

### Technical details ACV-1

- Operation: Automatic locking and unlocking, prevention against unintentional fall-off
- Min. tension Break Load: 500kN
- Min. shear Break Load: 420kN
- Min. compression Break Load: 2000kN
- Flange thickness: 15mm
- Material: Forged high tensile steel
- Surface treatment: Hot-dip galvanized
- SteveKnob handle: Stainless steel
- Counterparts: ISO Corner fittings
- Material number: 400268345
